PROFESSIONAL SUMMARY

Results-driven Unified Communications Engineer and Voice Architect with 10+ years of progressive experience in designing, deploying, and managing enterprise-grade UC solutions for global organizations, including Fortune 500 enterprises. Currently serving as a Modern Workplace Consultant and UC Voice Architect at NTT Cloud and Communications — a global leader carrying approximately one-quarter of Microsoft's voice platform traffic. Proven track record of delivering 100+ voice transformation projects worldwide, voice-enabling 600,000+ users across large-scale SBC deployments and Teams migrations. Expert in Microsoft Teams Direct Routing, Operator Connect, Calling Plans, SBC architecture (AudioCodes, Oracle, Ribbon), contact center solutions, and AI-powered voice technologies. Adept at navigating complex global telecom regulations, driving cost optimization strategies, and engineering zero-downtime solutions for mission-critical industries.

KEY ACHIEVEMENTS

- Architected one of the largest Microsoft Teams voice migration programs globally, voice-enabling **600,000+ users** across Fortune 500 and government organizations with zero-downtime cutover.
- Delivered **100+ voice transformation projects** across all regions for global enterprises including Nestlé, Siemens, Bombardier, Louis Vuitton, and Singapore Government.
- Reduced client telephony infrastructure costs by up to **35–40%** through platform consolidation, SBC harmonization, and UC cost optimization strategies.
- Built and deployed **AI-powered voice agents** with automated call handling capabilities (TTS, STT, Conversational AI) for enterprise banking and contact center clients.

CORE COMPETENCIES

UC Platforms & Voice	Microsoft Teams | Skype for Business | Direct Routing | Operator Connect | Calling Plans | Teams Phone System | Auto Attendant & Call Queues | Audio Conferencing
Session Border Controllers	AudioCodes SBC & Voice Gateway | Oracle Communications SBC | Ribbon SBC
Contact Center & AI	Luware Nimbus | Dynamics 365 Contact Center | AI Voice Agents | Text-to-Speech | Speech-to-Text | Conversational AI
Cloud & Administration	Microsoft 365 Admin | Azure Active Directory | Teams Admin Center | Exchange Online | Power Platform | Power BI
Tools & Automation	PowerShell Scripting | AudioCodes OVOC | Wireshark | CQD | RTMT | Syslog Viewer | Power BI Reporting
Infrastructure & Telephony	SIP Trunking | PSTN | Analog & SIP Paging | Cloud & Analog Fax | ATA Devices | Hazardous Environment Telephony | Legacy PBX Migration
Regulatory & Compliance	TRAI (India) | DOT (India) | MIIT (China) | Global Telecom Regulations | Regulated Countries (India, China, Turkey, UAE, LATAM)

PROFESSIONAL EXPERIENCE

NTT Cloud and Communications

August 2022 – Present

Modern Workplace Consultant & UC Voice Architect

Pune, India

Voice Transformation & Solution Architecture

- Serve as a UC Voice Architect at NTT — a global leader handling approximately 25% of Microsoft's voice platform traffic — designing and delivering enterprise voice transformation solutions for clients worldwide.
- Successfully delivered 100+ voice transformation projects across all regions, ranging from small-scale deployments to massive global rollouts for Fortune 500 organizations.
- Architect end-to-end telephony solutions encompassing Microsoft Teams Direct Routing, Calling Plans, Operator Connect, analog phone integration, SIP and analog paging systems, and cloud/analog fax solutions.
- Designed and deployed zero-downtime, cost-effective, and scalable UC solutions for mission-critical industries — achieving 99.99% voice uptime across enterprise SBC deployments, including a globally recognized oil refinery where uninterrupted communication was an absolute requirement.
- Designed specialized telephony solutions for hazardous industries such as petroleum refineries and chemical plants, where standard telephony equipment is not permitted.

Notable Client Engagements (Fortune 500 & Global Enterprises)

- Delivered voice solutions for industry giants including Nestlé, Hub International, Deutz, Forbo, Bombardier, Siemens, Ampol, Louis Vuitton, McCain, and the Singapore Government, among numerous other medium and large-scale organizations.

Large-Scale Migration & Automation

- Served as the Solution Architect for one of the largest Microsoft Teams voice migration programs, managing large-scale SBC deployments and migrating hundreds of thousands of global Teams users to a modern voice platform.
- Voice-enabled 600,000+ users on the Microsoft Teams platform across Fortune 500 and government organizations worldwide.
- Developed advanced PowerShell automation scripts and migration tools to streamline bulk user provisioning, SBC configuration, and day-to-day Microsoft Teams administration tasks.
- Built custom Microsoft tools and automation frameworks to ensure smooth, error-free migrations for clients across diverse telephony environments.
- Proficient in Microsoft Power Platform for building workflow automations that enhance operational efficiency.

Contact Center & AI Solutions

- Built and deployed contact center solutions using the Luware Nimbus platform integrated with Microsoft Teams for enterprise clients.
- Currently developing an advanced contact center solution for a banking client leveraging Microsoft Dynamics 365 Contact Center.
- Designed and built an AI-powered voice agent capable of automatically initiating and answering calls, incorporating text-to-speech, speech-to-text, and conversational AI capabilities.
- Worked with a major US banking client to architect a contact center solution from scratch, with comprehensive understanding of cost modeling, technical challenges, and AI voice auto-answering system requirements.

Global Regulatory Expertise & SIP Trunk Management

- Collaborated with virtually all major global SIP trunk carriers and possess in-depth knowledge of local telecom rules and regulations across most countries worldwide.
- Specialized expertise in deploying telephony solutions in regulated markets including India, China, Turkey, UAE, and LATAM countries.
- Closely collaborated with the Indian Department of Telecommunications (DOT) and Telecom Regulatory Authority of India (TRAI), including in-person visits to government offices for client project facilitation.
- Served as the Solution Architect for a platform built in India for international OSP (Other Service Providers), and acted as a consultant for Microsoft to develop a feasible, compliance-compliant, and cost-effective solution.

Cost Optimization & Platform Modernization

- Specialize in analyzing UC platform usage, device utilization, and infrastructure to design optimized solutions that reduce overall platform costs by 35–40% while improving system efficiency.
- Deliver techno-commercial consulting to help clients understand the total cost of ownership and ROI of their UC investments.
- Ensure call quality excellence through CQD monitoring, network assessments, and proactive infrastructure optimization.
- Possess strong understanding of Oracle OCCAS (Oracle Communications Converged Application Server) platform used by major US banking clients for integration with UC servers.

Oerlikon Balzers

March 2021 – August 2022

ICT System Specialist (Subject Matter Expert)

Pune, India

Client: *Oerlikon Group of Companies (15,000+ users across 36 countries)*

- Managed the Microsoft Teams tenant for 15,000+ Teams-only and Direct Routing enterprise voice-enabled users across 36 countries.
- Administered and maintained the Direct Routing infrastructure comprising 7,500+ EV-enabled users and 6 AudioCodes SBCs and Voice Gateways.
- Led the complete migration of all users from Skype for Business On-Premises to Microsoft Teams Only mode.
- Spearheaded the SBC harmonization project to standardize and optimize the global SBC infrastructure, reducing SBC management overhead by 50% and improving call routing efficiency.
- Deployed Direct Routing solutions in regulated countries, including India, ensuring full compliance with local telecom regulations.
- Developed an internal tool to eliminate dependency on Excel spreadsheets for phone number and DID management, reducing provisioning time by 70% and significantly improving operational efficiency.
- Architected a webhook-based monitoring solution to track device health and automatically generate tickets in the ITSM system when Teams devices went offline.
- Developed comprehensive PowerShell automation scripts for Teams administration, reporting, and bulk user operations.
- Deployed 15+ conference rooms equipped with Microsoft Teams-certified video conferencing devices.
- Developed a Power BI Audio Quality template for generating comprehensive call quality reports.
- Integrated Microsoft Teams call logs with AudioCodes OVOC (One Voice Operations Center) for enhanced voice analytics.
- Collaborated with the AudioCodes engineering team to deploy a network assessment system for continuous Office 365 service quality monitoring across all Oerlikon sites.
- Worked with global SIP trunk providers including Verizon, Tata Communications, and AT&T to resolve enterprise voice call issues.
- Successfully decommissioned Skype for Business servers to complete the full cutover to Microsoft Cloud.
- Served as a global knowledge coordinator for Microsoft Teams feature releases and internal knowledge base creation.

Mindtree Limited (Srijan Spectrum Role)

May 2020 – December 2020

Senior Engineer — Subject Matter Expert

Pune, India

Client: *Microsoft (North America & Canada Region — Enterprise Business)*

- Supported Microsoft's premier enterprise business across North America and Canada as an escalation engineer.
- Served as the escalation point for a team of 25 engineers, resolving critical and complex Microsoft Teams and Direct Routing issues.
- Collaborated directly with Microsoft's product group to identify and fix a bug in the Microsoft Teams application.
- Resolved long-pending critical issues for 100+ Microsoft global enterprise customers, reducing average resolution time by 60%.
- Supported 10+ global customer migration projects, troubleshooting migration-related issues end-to-end.
- Worked on Microsoft EDU and GCC (Government Community Cloud) tenant issue troubleshooting.
- Utilized Microsoft NGS data analysis tools for advanced Microsoft Teams troubleshooting.
- Managed problem tickets and worked with Microsoft engineering teams to deliver long-term fixes for persistent platform issues.

Infosys
January 2018 – May 2020

Senior Technology Engineer
Pune, India

Client: *Telstra Limited | Intel Corporation*

- Managed Skype for Business On-Premises and Hybrid deployment environments for enterprise clients.
- Led the migration of Telstra Limited's tenant from Skype for Business to Microsoft Teams Only mode.
- Executed legacy PBX cutover projects, migrating enterprise voice users from traditional PBX telephony to Direct Routing.
- Administered Cisco WebEx and Telepresence collaboration platforms.
- Managed Skype for Business enterprise voice-enabled setups and Cisco Call Manager environments.
- Created and managed diverse communication policies to meet specific client requirements.
- Monitored data generated by Intel applications and initiated corrective actions when thresholds were breached.

Crenova Plating Pvt Ltd
July 2017 – January 2018

IT Support Engineer
Pune, India

Client: *Crenova Group of Companies*

- Provided L1 service desk support for all Office 365 queues, troubleshooting end-user issues.
- Managed local device support including plant machinery firmware upgrades, CCTV camera systems, and user workstation issues.
- Enabled and configured Skype for Business for enterprise users.
- Monitored and maintained computer systems and networks, provisioning accounts for new users.
